Holdridge Farm Nursery

Route 27

LEDYARD, CONNECTICUT

P.O. Address
LEDYARD, CONN.

Telephone Ledyard Division
INGERSOLL 4-7020

(No toll charges from Norwich, New
London and Mystic Divisions)

LOCATION

The Holdridge Farm Nursery is located on Route 27 in the town of Ledyard, about 5 miles from Norwich and about 12 miles from New London.

From Norwich, take Route 2 (the Westerly Road) for about three miles — turn right onto first state highway, following Ledyard signs—drive about 1 mile and bear left onto Route 27 and drive 2 miles.

From New Haven and New London — cross the Groton-New London bridge and follow Route 84 for about 5 miles — turn left and follow Route 27 (Col. Ledyard Highway) for about 6 miles. (Two miles past Ledyard Center.)

From Rhode Island points — Go to the Rotary intersection of Route 84 and Route 2 — follow Route 84 towards New London about 7 miles — then turn right onto Col. Ledyard Highway (Route 27) — We are about 6 miles from Route 84. (Two miles past Ledyard Center.)

Located on the Big Hill.

BUSINESS HOURS

Our nursery is now open seven days a week from 8:00 A.M. until 6:00 P.M. During April and May, only, we stay open evenings until 8:00 P.M.

PRICES

All prices of nursery stock and garden supplies quoted here are subject to the Connecticut Sales Tax when it applies. All prices are subject to change if necessary to meet higher costs.

OUR GUARANTEE

We guarantee to furnish stock in good condition, up to grade and specifications. If your order arrives in damaged condition, report to us immediately. We will adjust complaint or refund your money.

We cannot guarantee livability after stock arrives on your farm as so many factors may be the cause. We will, upon proper proof, replace free all trees, etc., which may prove untrue to name or refund the price paid but we give no further warranty.

We do not guarantee balled and burlapped evergreens.

Our nursery is inspected yearly by an authorized State Inspector and a copy of our certificate accompanies each shipment.

SHIPPING

Please call for your order whenever possible. When orders must be shipped, please add 20% for packaging and postage.

Please give instructions in your order how we should ship. If no instructions are given, we will ship as is best in our judgment. Remember, trees must go by express, at customer's expense.

We will ship as near as possible to the date which you ask for but can not guarantee shipment on exact dates requested because of weather and other conditions beyond our control.

We start to ship plants just as early as the frost is out of the ground, or from the 1st to the 10th of April. We ship orders continuously until May 15. We recommend setting plants in April if possible.

Fruit trees will be shipped about April 1st, unless otherwise requested.

Absolutely no orders shipped after May 20. Fall shipments of strawberry plants not guaranteed or recommended.

STRAWBERRY PLANTS

For more than 40 years, strawberries and strawberry plants have been a major crop on the Holdridge Farm. Soil conditions in this area are very favorable for the production of long, bright roots which have made our plants so highly prized.

For this year, we planted about 22,000 plants, of which about 20,000 were virus free. All of our beds were set very early in the season and plants made an early start. We have chemically treated all the beds in an effort to completely control all root-eating insects.

We estimate that we have nearly 400,000 plants for sale this spring. These plants have the ability to grow well and to yield abundantly. We are trying to raise mostly those varieties which are satisfactory and profitable for the grower. This is the reason that our list of varieties is smaller than many other growers. We feel the first four varieties listed, namely: Howard, Catskill, Sparkle and Robinson are so satisfactory for most people, that we recommend the planting of these kinds.

On our farm, we still feel that fresh dug, freshly trimmed plants are more satisfactory to most growers than the cold storage plants now handled by most nurseries. During the plant season we have men digging plants every day and ladies trimming the dead leaves off the plants just as quickly as possible. Most of the plants leave our nursery within 24 to 48 hours of the time that they are dug. Damp sphagnum moss is used to keep them fresh during this time.

Our plants have the ability, under proper conditions, to bear heavily and profitably for you. We hope that we can sell you some of our healthy plants and start you off on your way to an excellent crop of berries.

VIRUS FREE STRAINS OF STRAWBERRY PLANTS

In reply to many questions—What are Virus Free Strawberry plants?—let us explain:

The strawberry research men of the U. S. Dept. of Agriculture have found that there is a virus disease present in a great number of the plant beds in this whole country. The virus disease causes a weakening of the vitality of the plants—resulting in poor plant growth and thin rows in fruiting beds and then in lower production of the fruiting plants. The virus disease is spread by plant lice from one plant to another.

Tests have been perfected to prove the freedom of the disease in individual plants. These plants are then propagated under disease free conditions and the virus free strains of plants result.

We continue to get new plants from indexed stock to propagate from—thus bringing you the real vitality and productive qualities in virus free plants.

Remember—plants which were virus free one year will not continue to be virus free after one or two generations under ordinary garden conditions.

STRAWBERRY CULTURE

CHOOSING THE PLOT—Strawberries will do well on good, fertile, well drained ground, which is slightly acid. An application of Chlordane will kill any Jap beetle grubs which might be in the ground.

FERTILIZING—Application of cow manure to the plot before planting is good. If commercial fertilizers are to be used, apply it around the plant (not closer than six inches) after they are planted. This can be repeated from two to four times during the growing season.

WHEN TO PLANT—We recommend planting just as early as possible in the spring and before May 15 if possible. We do not like planting at any other time of the year.

SETTING OUT PLANTS—The roots of the plants should be well spread and never bent. The plant should be at ground level with all roots covered and with the heart of the plant above the ground. Press the plant firmly into the ground. Wet roots before planting. Do NOT put fertilizer in the ground when planting.

SPACING—Set plants from 12" to 18" apart in rows and with rows from three to four feet apart.

CARE OF BEDS—Keep the ground hoed and the weeds under control. Pick the blossoms during the first season. On everbearing varieties, pick blossoms until about July 4th.

WEED KILLERS—The use of Crag, to prevent weed growth in strawberries was quite successful last year when it was used widely. This chemical prevents the germination of seed and will destroy weeds while roots are still very small. Weeds more than $\frac{1}{2}$ inch tall will not be hurt nor will grasses. Two pounds of Crag per acre are required for one application. About three sprayings per year will suffice. Complete directions are on each package.

SPRAYING—An increasing number of strawberry growers are spraying their growing beds to control spot diseases. We do not feel that this is necessary for small growers but bad cases of leaf spot will mean lower yields the following year. The same type of copper spray (e.g. Bordeaux) is used for strawberries as is used to combat blights on potato vines.

Plant lice or aphids which spread the virus disease can be controlled by the use of a Malathion spray. Commercial growers should check with their County Agent for best chemicals to use for their own particular equipment and conditions.

MULCHING—We recommend mulching strawberry beds lightly during the winter with straw, marsh hay or weed free material. Rake the straw between the rows early in the spring.

BASKETS

We purchased a carload of baskets during the winter and will have the following baskets at quoted prices while our supply lasts. We advise your purchase of baskets at these low prices and cannot guarantee that we will have baskets during the harvest season.

Quart baskets—\$2.00 per 100; \$15.00 per 1,000, at farm or by express not prepaid; 500 at 1,000 rate.

Pint baskets—100 for \$2.00; 1,000 for \$15.00.

2 quart Pansy Tills—100 for \$3.00; \$30.00 per 1,000, packed 250 to a carton.

4 quart Tills—\$5.00 per 100.

4 quart - 8 quart (peck) and 16 quart ($\frac{1}{2}$ bu.) Peach Baskets—when available—\$14.75 per 100.

Description of Strawberry Varieties

VIRUS FREE STRAINS

We recommend these first four varieties for most users:

HOWARD No. 17 (Premier)—Very early—productive—bears over a long season—medium plant maker—quality of berry good—fine for home or market.

SPARKLE—Midseason—medium to large size berry—dark color—excellent for freezing—good yielder—good plant maker.

CATSKILL—Midseason to late—large glossy berry—good yielder on moist ground—good plant maker.

ROBINSON—Available in virus free strain for the first time this year. Mid-season to late—small plants but an excellent plant maker—berries large—yield excellent. A fine commercial berry.

FAIRFAX—A nice home berry—dark berry—fair plant maker—yield good—medium to late. Very sweet.

VERMILLION—Large glossy red berries—very attractive fruit—good plant maker.

REGULAR STRAINS

We have small amounts of Empire and Pathfinder available in regular strains.

PRICE OF STRAWBERRY PLANTS LISTED ABOVE

25 for 75c — 50 for \$1.50 — 100 for \$3.00 — 300 to 700 @ \$2.50 per 100
— 1,000 for \$20.00 — 3,000 or more @ \$18.00 per 1,000.

For Prepaid Orders by Mail — Add 20% for Packing and Postage
Virus Free and Regular Strawberry Plants the Same Price This Year

EVERBEARING STRAWBERRIES

We do not believe that everbearing strawberries are profitable from a commercial standpoint in this locality. However, a few plants planted this spring will bear fruit for two months during the fall. We recommend that the blossoms of everbearers be kept picked off until July and that some kind of mulch be placed around the plants so that the berries will be free of dirt.

SUPERFECTION—We find this variety of everbearing strawberry increasing in popularity. Good sized berries—fairly good yield—good quality berry.

20TH CENTURY—We offer this new and improved variety of everbearing plant at our regular price this year.

Price of 20TH CENTURY and SUPERFECTION EVERBEARING PLANTS
—25 for \$1.00; 50 for \$2.00; 100 for \$4.00. For prepaid orders by mail add 20%.

RED RICH — Everbearers

This is a very excellent variety of everbearing strawberries. It is grown only by the Judson Wholesale Nurseries but is sold through many retail nurseries. We are set up to handle your orders as follows: Mail orders sent to us will be shipped direct to you from grower. For those who call at our nursery we will have at the start of the season a supply growing in pots.

RED RICH Prices—Prepaid or at the Nursery: 12 for \$2.95; 25 for \$5.00;
50 for \$8.50; 100 for \$15.00.

POWER LAWN MOWERS—Lawn Boys and Motor Mowers

We stock and sell many power mowers. Prices quoted are for new machines right out of the box. Look at the prices and compare before you buy.

ROTARY MOWERS

2 cycle, 18"	\$ 62.00	4 cycle, 18", Briggs & Stratton engine	\$ 79.50
2 cycle, 21"	\$ 82.50	4 cycle, 21", Briggs & Stratton engine	\$ 89.95
Self-propelled Special, 18"	\$ 99.50	21" Constellation	\$138.00

REEL MOWERS

18" — Highlander — 4 cycle	\$83.50
PYRAMID STRAWBERRY GARDEN—6—holds 50 plants	\$8.95

GARDEN TRACTORS

Planet Jr., 1 H.P. Tuffy	\$ 85.00
Planet Jr. Super Tuffy, 1½ H.P.	\$116.50
Planet Jr. 2½ H.P. Tractor, \$189.50—With Reverse	\$205.00

ROTARY TILLER—12" cutting width—Briggs & Stratton engine—Complete for	\$107.50
---	----------

HAND LAWN MOWERS	\$14.80 and up
------------------	----------------

TROMBONE SPRAYER—Barco—used in pail—will spray 12 to 15 feet high	\$5.95
---	--------

BIRD BATHS—Tan color — each	\$5.00
-----------------------------	--------

WILD BIRD FEED	5 lbs. 65c; 25 lbs.	\$2.50
----------------	---------------------	--------

SPECIAL PURCHASE—ALL STEEL WHEELBARROWS—semi-pneumatic rubber tires—regular price \$12.95. Our Sale Price \$8.45, not assembled; \$8.95, assembled.

ALSO A COMPLETE LINE OF GARDEN TOOLS, HOSE, ETC.

FERTILIZERS

We carry at our garden store a great variety of fertilizers for every purpose. Listed are a few that we can recommend.

Rose Food—5 lbs. 60c; 10 lbs. \$1.00; 25 lbs. \$2.25.

Acid Maker—(aluminum sulphate)—5 lbs. 65c.

Acid Fertilizer—5 lbs. 60c; 25 lbs. \$1.75.

Hydrate Lime—for lawns—50 lbs. 90c.

Bone Meal—5 lbs. 60c; 10 lbs. \$1.00; 25 lbs. \$2.00; 100 lbs. at market.

Organic Fertilizers—50 lbs. \$3.95.

Scott's Turf Builder—one 50 lb. bag used twice yearly on 5000 sq. ft. of lawn will keep grass green and healthy—Price Per Bag \$3.95

Cow Manure—dehydrated, pulverized—5 lbs. 50c; 50 lbs. \$2.25.

Sheep Manure—5 lbs. 50c; 50 lbs. \$2.00.

Garden Fertilizers—Vigoro—5 lbs. 50c; 10 lbs. 90c; 25 lbs. \$1.65; 50 lbs. \$2.50

Commercial Fertilizers—This is the brand which we use on our own farm and find it very satisfactory.

Corenco—5-8-7 Garden Fertilizer—80 lbs. \$2.40.

5-10-10 Potato and General Purpose—80 lbs. \$2.50.

...We will be glad to quote on ton lots of these and other analysis fertilizers on request.

GARDEN SUPPLIES

AIDS IN STARTING PLANTS

Vermiculite—to start seeds in—1 peck bag	45c	3 pecks, 85c; 4 bu.	\$2.20
Rootone—a hormone to aid the rooting of cuttings—pkg.		25c and \$1.00	
Fermate—to control damping off—8 oz.	75c	3 lbs.	\$2.25
5% DDT—for treating bulbs—1 lb.	45c	5 lbs.	\$1.15
Compost Maker—pkg.			\$1.25
African Violet Soil			20c and 45c

FOR FRUIT TREES

Use a dormant spray before buds start when temperatures are 40° or higher. After buds start, use an all purpose fruit spray about once each two weeks during growing season.

For Dormant Sprays—Scalecide—qt.	\$1.00;	gal.	\$2.25
Hubbard All Purpose, for all sprays on all types of fruit trees and berry plants		1 lb. 85c; 5 lbs.	\$2.50; \$22.50
DuPont—All Purpose Fruit Spray—1 lb.			\$1.15

FOR VEGETABLE GARDENS

Hubbard Spray-Dust—(All Purpose—controls Insects and Diseases)—1 lb.	85c		
	5 lbs.	\$2.50	
DuPont Garden Dust—1 lb.			\$1.25
DuPont Tomato Dust—2 lbs.			85c
Rotenone—for Insect control—1 lb.	35c	5 lbs. \$1.25; 50 lbs.	\$5.95
Bordeaux—for blight control—4 lbs.			95c
Arsenate of Lead—poison for eating insects—4 lbs.			\$1.35
For Aphids—Black Leaf 40—1 oz.	35c	5 oz. \$1.15; 1 lb.	\$2.69
Malathion—1 oz. 49c; 5 oz.			\$1.39

FOR FLOWER GARDENS

Farmrite Rose Dust—contains Lindane, DDT, Ferbam and Sulphur—1 lb.	90c		
	5 lbs.	\$3.45	
DuPont Floral Dust—a good all purpose floral dust or spray duster—79c; 1 lb.			\$1.25
Ortho Rose Dust—very good—1 lb.			\$1.25

FOR JAP BEETLE CONTROL

Chlordane — used on ground, will kill grubs — also drives out moles—1 lb. 35c; 5 lbs. \$1.20; 50 lbs.			\$6.00
Hubbard 5—used as dust will kill Jap Beetles—1 lb. 45c; 5 lbs.			\$1.20
50% DDT—used as spray will kill beetles—1 lb. 90c; 4 lbs.			\$1.50

FOR WEED CONTROL

In lawns—Weedone—½ pt.			\$1.00
Scotts Weed and Feed—pkg. covers 500 sq. ft.—2½ lbs.			\$1.00
For Strawberry beds, lawns, gladioli beds, corn, many other crops—Crag prevents seed germination—a wonderful labor saver—2 lbs. will cover 1 acre—price ¼ lb. pkg.			\$1.50

SOIL BUILDERS

We recommend to build up your soil with the following:			
Peat Humus—50 lb. bag			\$1.75
Pulverized Cow Manure—50 lbs.			\$2.25
Pulverized Sheep Manure—50 lbs.			\$2.00
Peat Moss—LOOK AT THIS PRICE—Bale			\$3.00

FOR ORNAMENTALS

For the control of nearly every insect and disease which attacks your flowering shrubs or evergreens we can recommend either of the following:			
Isotox—good all purpose—liquid—(for Birch leaf blight)—oz.			95c
Ornamental Spray—all purpose spray—powder form—8 oz.			\$1.40
Dusting Sulphur—to control Red Spider on Arbor Vitae—2 lbs.			65c
Malathion—good control for nearly every insect—1 oz. 49c; 5 oz.			\$1.39

BLUEBERRIES — SPRING AND FALL

Cultivated blueberries are hardy shrubs of rare beauty; they are doubly valuable because they are fruitful and ornamental throughout the entire year.

Every home garden, no matter how small, has room for at least a few of these blueberry plants. It takes only a few plants to produce all the berries that an ordinary size family will need. As a commercial proposition it is one of the most profitable fruits to grow. There is a big market for these delicious blueberries. They make good money in a very short time. You can begin picking the second or third year after planting. Plants last a very long time.

Cultivated blueberries grow in large clusters, plump, tender, and practically seedless. They will grow anywhere that strawberries will, doing their best on a moist, acid soil which is kept mulched all summer. For pollination, plant at least two varieties.

Our very low prices on large bearing age plants will give you berries years before smaller plants. We advise buying blueberry plants on a size basis.

We recommend that you plant at least two varieties. Our plants are ready during the season so you may call and pick the plants up immediately.

VARIETIES AVAILABLE

- ↳ JERSEY—Large, light blue berries. The bush grows erect and is very productive.
 - ↳ DIXI—This is probably the largest berry of all cultivated varieties—upright growing bush.
 - ↳ BERKELY—One of the newer varieties which has good size and color. It yields very well.
 - ↳ COVILLE—Recommended as the best of the newer varieties. Berries are large, light blue and the bush has attractive leaf coloring.
- PRICE—3 year plants at least 18 to 24 inches tall. Each 80 cents; 10 or more @ 75c; 50 or more @ 70c.

ASPARAGUS PLANTS

Home-grown asparagus is one of the easiest to grow and yet one of the most delicious treats available to the small gardener. Cut fresh in your own garden, it is unexcelled in flavor and quality. Start now to have a bed of your own.

Our plants, if heavily fertilized in your garden, will produce some asparagus for you the next spring. The second spring, you can cut it for about one month and after that, if you continue heavy fertilization, you can cut it up to the 1st of July each year. A bed, once started, will last as long as you take care of it.

VARIETY — MARY WASHINGTON

Heavy No. 1 Grade—25 for 75c; 50 for \$1.50; 100 for \$3.00; 500 for \$12.50; 1,000 for \$20.00. Packaging and postage, add 20%.

ASPARAGUS CULTURE

Set asparagus in rich soil a foot apart in a furrow 6 inches deep. Cover 3 inches and tramp. In hoeing, work soil toward plants so that by mid-summer the ground is level. Do not cover 6 inches at first or plant will be smothered. Cut sparingly the second year, after that cut all shoots 6 or 8 inches high until about the middle of June, then let tops grow. Fertilize asparagus liberally, with stable or hen manure any time in summer or fall after cutting season is over.

RASPBERRY PLANTS

Raspberries are one of the treats available to home gardeners and will bear handsome crops if a little care is given them. Here is a crop ideal for the part-time farmer which is overlooked by many growers. Very easy to freeze.

We offer strong, well grown plants, free of disease. Start a bed now so that you can enjoy raspberries throughout the summer. Once planted, a raspberry bed is good for from five to ten years, depending on the care given it.

✓ LATHAM (Red)—The fine old standard mid-season berry which folks have liked so well. It bears well under most any condition and is good for commercial or home gardeners. Available No. 1 grade and transplants.

✓ INDIAN SUMMER (Everbearing) (Red)—This is the best of the ever-bearing varieties of raspberries, bearing a crop in July and another throughout the fall. Has a good size and flavor. Transplants only.

✓ SODUS (Purple)—This is the leading purple raspberry. The berries are medium purple in color and good in quality. The plants are very productive and vigorous. No. 1 grade only.

✓ CUMBERLAND (Black)—This variety yields well under most any condition. It has a glossy black berry of excellent quality and bears in mid-summer. Black raspberries are gaining in popularity. They can be raised at less cost than the red varieties and stand on the vines a long time without becoming soft. No. 1 grade only.

RASPBERRY PLANT PRICES—Except SEPTEMBER

No. 1 Grade—All varieties: 6 for 65c; 12 for \$1.20; 25 for \$2.00; 50 for \$4.00; 100 for \$7.50; 1000 for \$65.00, not prepaid.

TRANSPLANTS

6 for 75c; 12 for \$1.50; 25 for \$3.00; 100 for \$10.00.

Not sold in lots of less than 6 of one variety.

✓ SEPTEMBER (Everbearing, Red)—This is one of the newer everbearing varieties of red raspberries which is reported to be very good. We have only transplants available. Bears in September the first year planted. Price: September only—Doz. \$2.00; 25 for \$4.00; 100 for \$12.50.

For Packing and Prepaid Postage, Add 20%.

BLACKBERRIES

Blackberries grow best on fertile loam. The rows should be six feet apart with each plant approximately two feet apart in the row.

✓ ELDORADO—This is the sweetest of all blackberries. The berries are very large, and bear in large clusters. The plants are very hardy.

Prices: 12 for \$1.00; 25 for \$2.00; 100 for \$7.00.

GRAPE VINES

These are all two year old No. 1 Grape Vines unless otherwise specified and should give you excellent results.

Concord (Blue)—The Standard blue grape.

✓ Portland (White)—Early, large and of good flavor.

✓ Caco (Red)—Early, fine flavor with large bunches.

✓ Fredonia (Black)—Very early, excellent quality.

Concord Seedless—Like Concord but no seeds. 1 yr. No. 1.

✓ Seneca (Yellow)—California type of hardy grape. The skin can be eaten. 1 yr. No. 1.

✓ Van Buren (Black)—Best new grape. Very sweet. 1 yr. No. 1.

Price: 40c each; 3 for \$1.00; 10 or more at 30c each; 100 or more, 25c each.

FRUIT TREES

We can offer this year a nice variety of fruit trees grown for us by one of the largest nurseries in the country. All are of top quality and are graded strictly to size.

Our low overhead on our farm enables us to sell these trees at a much lower price than that quoted by most dealers. We hope that you will compare sizes and prices with other concerns and that you will come and see the trees here at our farm. These trees will be ready in our sales cellar by March 21 or before.

Each year we are sold out of some varieties early. To be sure of varieties wanted, order now and they will be saved for you.

These trees are too large for parcel post shipments. They must be shipped by express or called for at our farm.

We advise that all fruit trees be planted as early as possible in the spring.

FRUIT
TREES

PEACH TREES - 1 YEAR

- Early East—early August
- Jerseyland—early August
- Golden Jubilee—very early, yellow, mid-August
- Triogem—mid-August
- Red Haven—excellent quality, mid-August
- South Haven—mid-August
- Summercrest—late August
- Early Elberta—similar to Elberta, but early, late August
- Fowler—large yellow, late August
- Valiant—late August
- Hale Haven—high quality yellow, good shipper, early Sept.
- Golden East—early September
- Belle of Georgia—large white peach, early September
- J. H. Hale—very large yellow, mid-September
- Elberta—standard canned peach, mid-September
- White Hale—mid-September

PRICES
9/16 inch
caliper
4-5 feet tall
90c Each
Not Prepaid

ONLY J. H. HALE REQUIRES CROSS-POLINATION

All Peaches listed above are freestone.

SPECIAL OFFER TO COMMERCIAL GROWERS

If your total order for trees is 50 or more, we offer a discount of 10c per tree from quoted prices. All orders of fruit trees must be called for or shipped by express at your expense.

DWARF FRUIT TREES

Dwarf fruit trees are a very popular item for gardeners with a limited space. These trees grow about 8-12 feet tall at maturity and will use a correspondingly small space. Dwarf pears bear two years from planting; dwarf apples from two to four years. Our dwarf trees will be 2 years old, and 9/16 inch in caliper.

➢ DWARF APPLES—Varieties available: McIntosh, Cortland, Red Delicious, Greenings, Yellow Delicious, Baldwin.

➢ DWARF PEARS — Varieties available: Clapp's Favorite, Bartlett, Seckel and Anjou.

➢ DWARF CHERRY—North Star.

PRICES—All Dwarf Trees—\$1.75 each.

ALL VARIETIES LISTED ABOVE ARE IN ORDER OF RIPENING

APPLES — 2 YEARS

11/16 inch caliper—5 to 6 feet tall

- ✓ Lodi—early August
- ✓ Red Astrachan—early Auugst
- ✓ Early McIntosh—mid-August
- ✓ Dolgo Crab—late August
- ✓ Gravenstein—late August
- ✓ Milton—late August
- ✓ Wealthy—early September
- ✓ McIntosh—mid-September
- ✓ Cortland—late September
- ✓ Red Delicious—late September
- ✓ Macoun—late September
- ✓ R. I. Greening—early October
- ✓ Jonathan—early October
- ✓ Roxbury Russett—early October
- ✓ Turley Winesap—early October
- ✓ Northern Spy—mid-October
- ✓ Yellow Delicious—mid-October
- ✓ Red Rome—mid-October
- ✓ Baldwin—mid-October

90c Each — Not Prepaid

PEAR TREES — 2 YEARS

11/16 inch caliper—5 to 6 feet tall

- ✓ Clapp's Favorite—early canning or eating pear—mid-August
- ✓ Bartlett—best canning pear—early September
- ✓ Gorham—Late Bartlett type—early September
- ✓ Seckel—small sugar pear—mid-September
- ✓ Bosc—late Russett Pear—late September
- ✓ Sheldon—very sweet—early October
- ✓ Anjou—very juicy—mid-October
- ✓ Kieffer—large yellow—mid-October

\$1.00 Each

Not Prepaid

CHERRY TREES — (mazzard roots)

9/16 inch caliper—4 to 5 feet tall

- ✓ Windsor—dark red often called Oxheart—early July
- ✓ Black Tartarian—large sweet, black—early July
- ✓ Schmidt's Biggareau—large, almost black, sweet—mid-July
- ✓ Napoleon—yellow with red cheek, sweet—mid-July
- ✓ Montmorency—sour cherry, best for pies—late July

\$1.25 Each

Not Prepaid

PLUM TREES — 2 YEARS

9/16 inch caliper—4 to 5 feet tall

- ✓ Abundance—round, red, yellow flesh—early August
- ✓ Burbank—large round, reddish, purple—early August
- ✓ Yellow Egg—round—mid-August
- ✓ Stanley Prune—large, dark blue, freestone—mid-September
- ✓ Bradshaw—round, red—mid-September
- ✓ Reine Claude—round, green—mid-September
- ✓ Fellemburg—large, good canner—early October

\$1.00 Each

Not Prepaid

With the exception of the Montmorency sour cherry, the fruit varieties listed on this page usually yield better when the opportunity for cross-pollination is provided by the bloom of other varieties of the same kind of fruit.

THE VARIETIES LISTED ABOVE ARE IN ORDER OF RIPENING as checked by Dr. R. H. Sudds of the University of Connecticut, who is in charge of the Pomology Department.

OTHER FRUITS

- ✓ 5 IN 1 APPLE—9/16 inch caliper—5 to 6 feet tall. The following five varieties are grafted on one tree: Baldwin, McIntosh, Red Delicious, Yellow Delicious and Jonathan—Each \$2.00
- ✓ QUINCE—2 year—1/2 inch caliper. For old fashioned quince jelly \$1.00
- ✓ HANSON'S BUSH CHERRY—2 to 3 feet tall—plant both for fruit and for its beauty \$1.00
- ✓ APRICOT—2 year, 4 to 5 feet tall—Early Golden and Moorpark—plant two \$1.25
- ✓ NECTARINES—two—Garden State and Surecrop—9/16 inch caliper \$1.25

BULBS AND TUBERS

Not less than 6 of a variety will be labelled.

Postage Prepaid—Add 20%

Gladioli Bulbs—These bulbs are grown for us by a specialist in glads. All beds have been dusted and sprayed regularly so that flowers will be at their best this coming year. No. 1 grade bulbs are at least 1½ inches in diameter. They will all produce beautiful spikes this summer. Color pictures of all varieties will be on display at our nursery.

POINTS ON LANDSCAPING YOUR HOME

1. Plan for year around beauty with evergreens to set off the house in winter as well as flowers for summer beauty.
2. Work out a rough plan for your home, dividing your lot into three parts, as follows—A Public area, to be viewed from the street; a Service area, for clotheslines, utilities, vegetable garden, etc.; and a Private area, for picnics and relaxation.
3. Foundation Planting—Your Foundation planting should be planned so as to provide a frame for your house. The shrubs should always be planted so as to emphasize the beauty of the house and never to obscure it. Always keep the mature height of the plants in mind. Use plants which blend well together and you may use groups of various shade or types of evergreens which appeal to you. Planting should soften the harsh corner lines of the building, give emphasis to the doorway, and make the house a part of the landscape.
4. Shade trees should be planted with their mature size in mind. Plant in front to frame the house, not to hide it.
5. Plant early blooming flowers and shrubs so that they may be seen from inside your house. Summer blooming shrubs are recommended for your picnic area.
6. A free bulletin "Landscaping Your Home Grounds" by H. O. Perkins, may be obtained by writing the University of Connecticut, or from any Extension or Farm Bureau office in the state.
7. We have a free booklet, "How to Plant", available at our nursery. Ask for your copy.

BROAD LEAF EVERGREENS

We offer a nice variety of azaleas, rhododendrons and of other broad leaf evergreens for your inspection. These are all burlapped or growing in pots and cannot be shipped.

AZALEAS

EVERGREENS

CASH AND CARRY

During the shipping season this spring we will have on hand a good variety of Evergreen Shrubbery. These will be all dug with a big ball of dirt and balled and burlapped.

It is very simple to plant Evergreens. Just dig a hole big enough to set the ball in, and cover with dirt.

You are invited to come to our farm during the season, look over our stock and take your pick.

Listed below are a few of the many bargains:

Meyer's Juniper—12-15"		{	\$2.00
Globe Arbor Vitae—12-15"

Delphinium—Pacific Hybrids—potted		40c

Other varieties of perennials will be available at various times in packages. We also carry an assortment of perennial flower seeds in stock.

GREETINGS:

This is just a word to thank you for your business. We have tried to meet you all with a friendly greeting and to honestly help you as you shopped here for nursery stock and for your garden supplies.

And I think most of you must like our way of doing business for each year our business grows and more and more people make our store their garden headquarters.

Hope to see you here often in 1956.

PAUL HOLDRIGE.

OUR HELP

We are still largely a family concern with all of the family helping out on busy days. We have some of our regular men who have been with us for years, and on busy weekends in the spring we have some folks who are good gardeners in their own right who are here to help us and to help you.

OUR EQUIPMENT

We have a garden store 26x60—just full of seeds, bulbs, fertilizers and garden needs. We have a lath house 60x100 for Balled Evergreens and Shrubs. Trees under this semi-shaded area keep better and will live better for you. We have two storage cellars 24x50 each for fruit trees. Also we have stockrooms full of baskets and other stock.

OUR STOCK

We have either growing here on our own farm or ordered for early spring delivery, large amounts of all the items listed here in this price list. Available will be about 400,000 strawberry plants—6,000 fruit trees—5,000 blueberry bushes—8,000 evergreens—1,500 azaleas and other stock in proportion.

FOR QUICK SERVICE

Our shipping season for nursery stock is short and we are always rushed at that time. To help us serve you better, we are asking your cooperation by doing the following—

1. Send full payment with order if possible.
2. Allow us to substitute varieties when necessary.
3. Call at the nursery to pick up your order and get your stock fresh. Make arrangements for us to have your order ready.

We invite you to call at our Nursery at any time. We are open seven days weekly from 8:00 A.M. till 6:00 P.M.

Telephone—Ledyard Division:
INgersoll 4-7020

(*No toll charge from Norwich, New London and Mystic division.*)
